Internet Child Exploitation Unit/Computer Forensics Unit Overview Presentation

Detective Sergeant Blair Ramsay, Cybercrime Unit of Criminal Investigations, presented an overview of the 'Internet Child Exploitation (ICE)' and 'Computer Forensics' Units to the Board. Cybercrime includes threats where technology is the target such as hacking, denial of service, or ransom ware. It also includes fraud, human trafficking, and internet crimes against children. The cost of these crimes is expected to hit 6 trillion by 2021. He raised awareness that the most frightening reality is the international trend of child abuse images and videos growing from under 1 million in 2008 to over 45 million in 2018. International investigations logged over 1 million reports in 2014 with over 18.4 million in 2019. The Provincial Strategy to Protect Children from Exploitation on the Internet includes 28 Ontario Police Services working together. The ICE Unit investigations are constantly ongoing with the assistance of the Computer Forensic Unit. The Service values the work of community partners such as CAS, SAVS, HSN Crisis Intervention, Canadian Centre for Child Protection, and internet services that monitor their own content. It is imperative to teach young children 'body safety rules' and what an online 'friend' means. Keep all electronic devices out of private areas. Never stop learning – the internet is the new playground.

Chair Vagnini and Chief Pedersen both thanked Detective Sergeant Ramsay for the chilling and unnerving presentation.
